OPACITY MONITOR OFF-STACK TEST KIT

40 CFR Part 60 PS-1 Procedure 3 paragraph 10 requires the user to “perform the zero alignment audits with the COMS off the stack at least every three years.”

Do you have a reliable way to assure your compliance?

Environmental Monitor Service has engineered an off-stack test kit which can be used with all EMS double pass Opacity and Dust Monitors. This kit includes everything that is needed to perform an off-stack zero.

Key Features

- ✓ Compliant with 40 CFR Part 60 PS-1 Procedure 3
- ✓ Easy secure setup- mounts exactly as on the stack
- ✓ Works with existing audit device
- ✓ 3-Point level adjustment-includes bubble level
- ✓ Constructed of anodized aluminum
- ✓ Can be used with all EMS double pass Opacity and Dust Monitors
